

Catherine Caballero, B.S.

Catherine Caballero has been dedicated to the field of forensic science since 1994. Her presence in the community is strong as a result of her extensive experience working with forensic scientists around the world. As a co-founder and owner of Forensic Training Network, she provides training to the forensic community by developing on-line training modules and delivering on-site trainings.

Previously, she worked for Applied Biosystems where her primary responsibility was to provide training and troubleshooting support to forensic DNA scientists. She also gained extensive experience developing and delivering hands-on training programs, conducting technical workshops and presenting at seminars and tradeshow. Catherine is considered to be a leader in this arena and is a mentor to many of her colleagues.

Catherine worked for the Texas Department of Public Safety Crime Lab during the years in which DNA technology was first adopted by the state of Texas. She was credited with establishing the DNA lab in Corpus Christi, validating and implementing STR technology in Houston, and providing hands-on training for her colleagues throughout the state. In addition, Catherine conducted crime scene investigations with the Texas Rangers and performed casework analysis including serology, DNA analysis, and court testimony. During her college years, Catherine interned at the California Criminalistics Institute and worked for two private labs. She received a Bachelors of Science in Forensic Science with a minor in Chemistry from the California State University, Sacramento.
